QUANTUM

PORCELAIN TILES

2025

smart edition

Catalogue

Our surfaces capture the tactile and visual essence of natural materials while enabling spaces to be reimagined, designed and transformed in unconventional and contemporary ways.

A modern interior space, likely a cafe or bar, featuring a large, leafy tree in the foreground. To the left, a curved counter is supported by a thick, cylindrical pedestal. Behind the counter, a wooden shelving unit displays various coffee products, including bags of coffee and bottles. The wall behind the counter is composed of large, light-colored tiles with a grid pattern of circular recessed designs. In the center, a long, curved wooden table is supported by a thick, cylindrical pedestal. Several white, cylindrical stools with black horizontal bands are arranged around the table. To the right, a smaller, round wooden table is supported by a black metal stand, with two black metal stools. The floor is made of large, light-colored square tiles. The overall aesthetic is clean, modern, and minimalist.

Quantum surfaces are a breakthrough in design, thanks to the use of state of the art technology. A revolutionary production process that combines materiality with aesthetic appeal, transforming them into distinctive elements for any space, be it residential or commercial.

Form,
Function,
& Lifestyle.

THE VALUE OF OUR IDENTITY

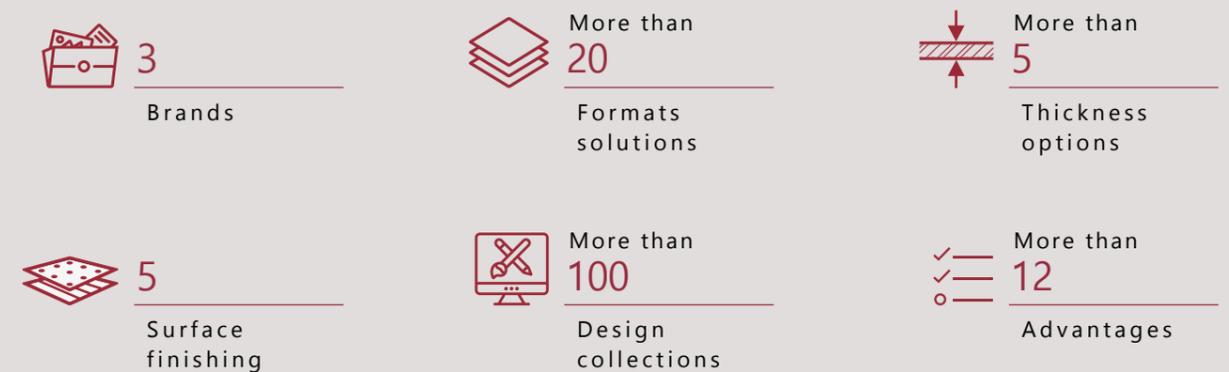

The strength of the QUANTUM porcelain tiles brand is rooted in the history of Arabian Ceramics that is now one of the leading players in the KSA ceramic industry. Founded in 2006 by Sheik Khaled Bagedo, the company is located at Al Khomra District, Southern Industrial Zone of Jeddah and has a daily production of 40 000 sq. divided up into a number of brands. It has an outstanding product portfolio suited to all floor and wall covering requirements, including outdoors high thickness products.

OUR NUMBERS

OUR TILES

SUSTAINABILITY & ENVIRONMENT

SUSTAINABLE PRODUCTION

Well-planned use of technologies, procedures and resources, committed to a world that consumes less raw materials, and use these resources in a conscientious way by minimising waste.

ECO-INNOVATION

Product development practices leading to sustainability by reducing any environmental impacts throughout the entire life cycle, taking also into account functionality, quality, safety, cost, manufacturability, ergonomics and aesthetics.

ENVIRONMENTAL RESPONSIBILITY

Reduce-reuse-recycle, are they guide lines of our environmental policy. From the control of air emissions and energy consumption to the recycling of industrial waste, in order to protect the world in which we live, to ensure the lives of future generations.

SOCIAL RESPONSIBILITY

Supporting issues that affect society, such as advocating for child labour laws, purchasing fair trade products, following ethic policies, integrity and honesty ensuring the well-being of the entire organization.

The conventional sizes, which have made tiles an interior design must over the years, have been enriched with new performance and refined aesthetics, to decorate any kind of design, in both public and private environments.

FINISHINGS

TYOLOGY

SHADE VARIATION

ANTISLIP RATE

R9 PTV 18-24	Tiles will mostly be smooth glazed matt finish tiles which will record this low value when wet. Suitable for most domestic internal applications, when used in a bathroom a bath mat (or towel) is essential to step on to from the bath or shower.
R10 PTV 25-35	Tiles will usually be glazed matt tiles which show these values only when wet. Besides domestic bathrooms, where the use of a bathmat is essential, they may be considered for other domestic areas such as kitchens, living areas, hallways, etc.
R11 & R12 PTV 36+	Tiles in this category it may be regarded as safe for installations including wet rooms, bathrooms, kitchens, porches, halls, cloakrooms, living rooms and outdoor areas. They may also be used for public areas such as cloakrooms, lavatories, communal showers, swimming pool surrounds, and larger areas such as shopping centres, airport concourses, hotel foyers, public walkways, etc.

RECTIFIED EDGES.

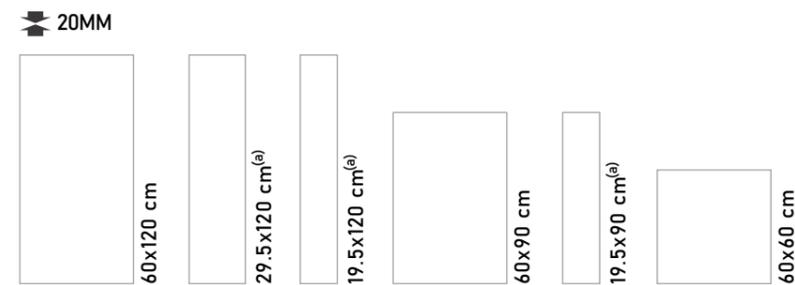

All Tiles are cut/ground on all four sides after the firing stage to maintain uniformity on the length, width, straightness of sides and rectangularity/squareness

EXTRA THICKNESS.

Quantum high thickness porcelain is the product with high technical performance, ideal for flooring in outdoor environments as well as for as public areas with a large influx of people and road traffic that need to have high resistance flooring, low maintenance and high non-slip properties to be completely safe and functional.

- VERSATILE AND MODULAR
- EASY TO INSTALL
- MATCHING INDOOR OUTDOOR
- EASY TO CLEAN
- SUPERIOR BRAAKING STRENGTH
- REMOVABLE AND REUSABLE

FOR RESIDENTIAL SPACES

Different ways of application

Given the product's size and due to the flatness tolerance (in accordance with international standards), we recommend, specially for floor laying, an one-third offset or a herringbone pattern and it is advisable to overlap no more than 1/4 of the adjoining piece when laying with offset joints.

the perfect combination between high technical performance and aesthetics

Arabian Ceramics company is certified with the International Standard DIN EN ISO 9001/ ISO 13006 and SASO, and have the Indoor Air quality Certification, Floor score, making them a safe and smart choice for every space. Our products are also certified with Environment Product declaration, verified based on LCD.

Our products have tested all possible pre-requisite clearance from respective authorities and also has been recommended by Saudi standards and metrology authority. The technical properties of Porcelain and ceramic tiles meet specific requirements through High level of process control, Premium raw materials, Precise firing process, Controlled Vitrification process, Very Low porosity allowing perfect performance.

Our tiles are suitable for : Floors and walls| Homes| Residential & Public outdoors| Restaurants| Malls| Airports| Hospitals & Clinics| Hotels| Schools| Offices| Shops| Sport centers| Museums & Art galleries

PROPERTIES & SPECIFICATIONS

DESCRIPTION

Glazed, dry-pressed, porcelain tiles, with a water absorption < 0,5%, manufactured using a single-firing process. Waterproof, stain and acid-resistant, antibacterial, non-slip and hard wearing.

APPLICATIONS

Suitable for indoor use in residential and commercial areas, both floor and wall. Also suitable for indoor use with underfloor heating and for exterior façade cladding. Suitable for exterior flooring, with antislip finishing and/or extra thickness.

ADVANTAGES

Dimensionally consistent and hard wearing. Non-toxic material, do not release any hazardous substances during or after their long service life. Fungus and mould resistant. Durable, with an excellent life cycle performance.

STANDARDS

The superior technical properties of the tiles allow them to perform well in terms of dimensional stability, flatness, breaking strength, bending strength, and resistance to serious wear and tear. Arabian Ceramic products are produced in accordance with Saudi Arabian Standard SASO-ISO-13006; European Standard BS EN 14411 & International Standard ISO 13006 and go beyond the current international standards.

MAIN CHARACTERISTICS

-  Acid resistant and Stain resistant
-  High Strength
-  Resistant to scratching and mechanical damage
-  Fire Resistance
-  Free of volatile compounds
-  Durability
-  Environmentally friendly
-  Antibacterial
-  Heat and frost resistant
-  Stable chromatically
-  Low maintenance
